

SILVERSTEIN[®]

WORKS

- ◆ Exceptional Positional Integrity of reed with Minimal Surface Contact
- ◆ Liberating String Design for Maximum reed vibration
- ◆ Full Articulation of Entire Register
- ◆ Patented Fine Tuning System for Unprecedented Control
- ◆ Patented Moisture Retention to provide reed moisture and reduce warping
- ◆ Customizations for special size mouthpieces (including Bass Clarinet and Baritone Saxophone)

Silverstein Works™ understands the journey shared by all musicians and what perfection can mean to them. The truest artistry and perhaps the greatest tragedy of perfection is that it will always remain just out of reach.

A musician is a perfectionist. The right sound – pitch, inflection, tone, breath, response, etc. – that desire to always improve and perfect the sound, your sound, is a never-ending journey. In this journey the right companion can inspire you.

The right instrument can be your ship; the right mouthpiece, its captain. Reeds can be the great wind in your sails and still, if those sails are found wanting your journey may yet waver.

Lifetimes and even generations are expected of the best instruments. Let now the Silverstein Ligature become a part of those guarded expectations you reserve for the most important components of your journey.

The Silverstein Ligature was designed to give players the purest

sound, to accompany musicians with the support and dedication they and their instruments deserve. From the grand concept of liberating a reed's natural vibrations, to the execution of the Ligature that does that and more, this is a machine worth your attention: Minimal surface contact with the reed; strength to secure it. Self-adjusting design allowing it to move and grow with you. Pulling up on the reed, not pinching the sides of the mouthpiece. Patented Fine Tuning system for unprecedented control. Moisture Retention to provide real moistness directly to the reed, keeping it moist and reducing warpage. Tested performance and the proven identification of more refined harmonic partials indicating a fuller, richer sound.

Our Ligature is designed to truly add to your journey and amplify for your style. Silverstein Works™ has crafted the perfect piece to accompany you on your reach for perfection:

The Ligature for Perfectionists.

PERFECTION IS NOT A DESTINATION— IT'S A JOURNEY.

- CLASSIC SILVER
- TITANIUM GRAY
- CARBON BLACK
- DIAMOND GOLD

▲ The cord used in the Silverstein Ligature was created with the same technology and manufacturing process that amazingly helped land a rover on the surface of Mars in 2012.

“ The Silverstein Ligature is a definite advance for saxophonists. It allows the reed to project clearly without bias and there is a way to adjust vibrational capacity to one’s liking. An excellent product! ”
DAVID LIEBMAN

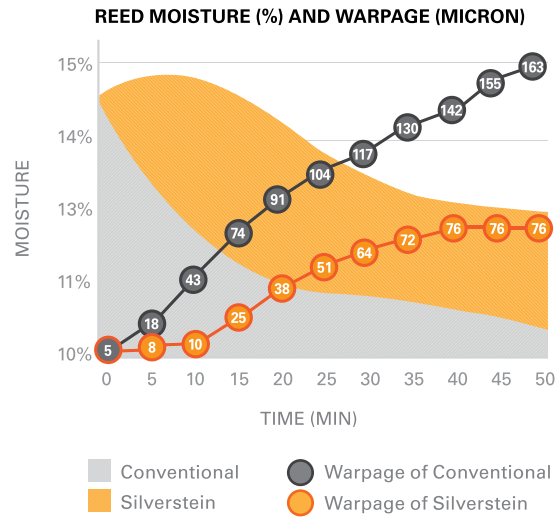

“ I was totally surprised when I tried the Silverstein Ligature. There seems to be more low end and air in the sound, and it is consistent throughout the range of the horn. ”
JERRY BERGONZI

MOISTURE RETENTION

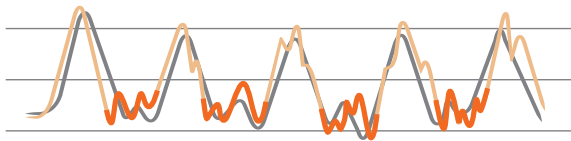

The first ever ligature with the ability to moisten the reed. The cord of the Silverstein Ligature is composed of a special material that allows it to absorb and retain moisture. The ligature can actually be wet or soaked before mounting to provide moisture to your reed, helping to keep it wet longer during any performance.

The unique feature can also help reduce reed warpage by more than 50%, as shown on the graph. You will no longer have to worry about the reed during an extended performance, and with the Silverstein Ligature, your favorite reeds can remain valuable to you for a much longer period of time.

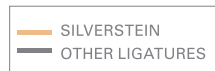

MORE HARMONIC PARTIALS

The unique cord allows the Silverstein Ligature to minimize surface contact with the reed. With minimal surface contact the reed is able to vibrate more freely, enhancing its natural qualities and giving you the purest sound possible. The difference can be seen in comparison audio laboratory tests that clearly show the more defined harmonic partials of the Silverstein Ligature, indicating a richer, fuller sound.

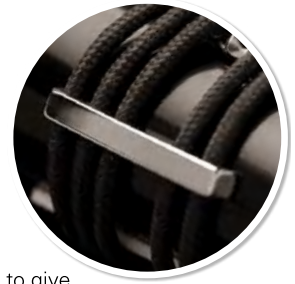

**By audio lab test. See more details on our website.*

FINE TUNER

Silverstein Ligature comes with a patented Fine Tuning System on the ligature itself. The Fine Tuner Mechanism changes how the ligature responds to the vibrations of the reed, subtly tuning the focus and color of your sound to give you unprecedented control and flexibility. With it, you can accentuate a focus and color of sound that perfectly accommodates the music you play at any time.

LIFETIME WARRANTY

The Silverstein ligature also comes with a limited lifetime warranty. Please see the terms & conditions on our website.
